Charleston County School District Generative AI Web Page: Data and Student Privacy Passages

Excerpted verbatim from *Generative AI (Charleston County School District web page, ccsdschools.com)*. The source has no page numbers; locations are given by section. Web page text.

What families should know (excerpt)

Source: web page, section 'What families should know'

How will CCSD protect student data?

Any AI tool adopted by the district must meet data privacy and security standards consistent with FERPA and district policy. Student information will not be used to train commercial AI models without appropriate authorization.

Can AI be used to make decisions about my child?

No. District policy explicitly prohibits AI from serving as the sole basis for high-stakes decisions, including discipline, special education placement, or academic advancement. Human judgment and oversight are required in all such decisions.
