# Dallas ISD AI Handbook: Data and Student Privacy Passages

Excerpted verbatim from *Artificial Intelligence (AI) in Dallas ISD: A Handbook for Responsible and Innovative Use (Dallas Independent School District)*. Page numbers match the document's own page numbering. Ellipses (…) mark omitted text.

## Overview of AI in Education (excerpt)

Source: page 3

Issues such as data privacy, … are critical concerns that need …

## Respect, Privacy, and Data Security

Source: page 4

Users must follow district policies on privacy and data security when interacting with AI tools. Personal and student data must be protected, and AI should not be used in a way that violates privacy laws or district guidelines. Teachers are responsible for educating students about the importance of protecting their data.

## Safety, Privacy and Security

Source: page 5

### AI Safety and Compliance

The District complies with all relevant safety, privacy, and security regulations regarding the use of technology, including federal laws FERPA and COPPA, to protect student data and privacy. The district will work closely with AI vendors and tool providers to ensure that all AI applications adhere to strict safety, privacy, and security standards. Contracts with AI vendors will include clear requirements for compliance with legal regulations, as well as ongoing monitoring to ensure continued adherence. These measures will ensure that all AI tools used within the district meet the highest standards of security and data protection.

Board policy CQ Legal and Local guide our use of technology and resources.

### Data Guidelines for AI Technology

To protect district information and student data, regulated, confidential, and sensitive data must not be input into AI technology that is not listed on p.9 of the handbook. Examples of this data include:

- Regulated Data - Health information, credit card information; and criminal justice information
- Confidential Data - Personally Identifiable Information (PII), Intellectual property
- Sensitive Data - Operational information, Personnel records, internal communications

A full listing of these data types can be found in CQ(REG).

## Considerations for AI Use (excerpt)

Source: page 6

### Best Practices for Digital Citizenship

Students are also taught about their digital footprint and how their online actions affect their personal and academic reputation.

**Ethical Use and Transparency**

The District will ensure ethical AI practices and transparency in education by implementing clear policies that protect student privacy, ensure data security, and promote fairness. By complying with legal standards, conducting regular audits, and checking for bias, we will safeguard responsible AI use. Transparency will be maintained by openly communicating how AI tools work, the data they collect, and their decision-making processes.

## Glossary of AI Terms (privacy-related excerpts)

Source: pages 11–12

- Consent Management: The process of obtaining, tracking, and managing user consent, especially in compliance with laws like FERPA and COPPA.
- COPPA (Children's Online Privacy Protection Act): A federal law that imposes requirements on websites and online services to protect the privacy of children under 13 years of age.
- Data Encryption: The process of converting data into a coded format to prevent unauthorized access during storage or transmission.
- Data Privacy: The practice of handling and protecting personal data to ensure it is only used for its intended purpose and safeguarded from unauthorized access.
- Digital Citizenship: The responsible use of technology and the internet by students and educators, encompassing ethical behavior, privacy, and respect for others online.
- FERPA (Family Educational Rights and Privacy Act): A federal law that protects the privacy of student education records and gives parents certain rights regarding their children's education data.
