We maintain data privacy-controlled environments.

DCPS Early Approach (excerpt)

Source: web page, section 'DCPS Early Approach'

The principle areas of focus we pulled from those early guidance documents centered on Alignment of the AI Model to Educators' Vision for Learning Safe and Effective Systems Algorithmic Discrimination Protections Data Privacy and Human Oversight

Concerns and Dangers (excerpt)

Source: web page, section 'Concerns and Dangers'

We look into ethical considerations, the potential for academic dishonesty, the presence of bias in AI tools, and the crucial issue of student data privacy. By understanding these concerns, teachers, and administrators can make informed decisions about using AI responsibly and creating a safe and enriching learning environment for all students.

Data Privacy

Blog post: AI Tools and Student Data Privacy by Eric Curts in Control Alt Achieve: transforming education with technology posted on 13 March 2024

AI Tools to Consider

Source: web page, section 'AI Tools to Consider'

The next sections are separated purposefully. It is important to understand why. As outlined above in the section on Concerns and Dangers, we have to remain mindful of sharing private student information, focus on instructional value, and only then, look for teacher productivity assistants.

Contracted Provider: SchoolAI and Google Gemini

SchoolAI is uniquely FERPA, COPPA, and SOC2 compliant. Data is processed in the US. Engineering and development staff are in-house and on-site.

SchoolAI has contracted agreements with large language model providers such as OpenAI and Microsoft that ensure personal student data is not saved or used by third-parties to train or refine future models.

SchoolAI does not sell student data and prohibits behavioral tracking.

Likewise, Google Gemini Education protects adult user data with the Google Workspace for Education's Terms of Service we already have. However, it is only available for adults for now. It will be available to students in the future as they develop transparency tools for school leaders and guardians.

Approved by Terms of Service and Privacy Policy Provider:

MagicSchool is available in our high schools based on the age of 13 for use only when a teacher provides the link.

BriskAI is available in our high schools based on the age of 13 for use only when a teacher provides the link.

Disclaimer: District technology leaders are not endorsing specific tools on the following lists. Please consider the rubric and data privacy factors previously mentioned.

Now What? (excerpt)

Source: web page, section 'Now What?'

Don't be scared to use AI professionally and instructionally as long as you're protecting student data.
