Jeffco AI Web Page: Data and Student Privacy Passages

Excerpted verbatim from *Artificial Intelligence (AI) (Jeffco Public Schools web page)*. The source has no page numbers; locations are given by section. Ellipses (…) mark omitted text. The source is a district landing page (with links, news items and an FAQ), not a formal policy document; headings below are the page's own wording or a description of the page section.

AI and Jeffco's Strategic Plan (excerpt)

Source: web page, section "AI and Jeffco's Strategic Plan"

- AI will be implemented ethically and responsibly, respecting privacy and security.

News: Strengthening AI Security

Source: web page, news item (September 18, 2025)

Jeffco Public Schools is blocking external AI tools that don't meet its data privacy, security, and content standards

Guidance for Students: Principles (excerpt)

Source: web page, section "Guidance for Students & Educators"

- AI should be used safely and securely
- Data that is confidential or personal should not be entered into publicly available GenAI tools.

Guidance for Educators: Tool Review (excerpt)

Source: web page, section "Guidance for Students & Educators"

Jeffco educators use AI tools to make learning more personalized, engaging and effective while prioritizing student safety and learning.

We follow a rigorous review process to ensure that every AI tool meets our standards for security, accessibility and educational value. Each tool is evaluated for its purpose, age appropriateness, ease of use, technical needs and impact on student privacy.

Approved tools fall into three categories:

- Restricted tools require special approval or are prohibited due to security or safety concerns

FAQ: What AI tools does Jeffco support? (excerpt)

Source: web page, FAQ

Jeffco-supported tools for students include:

- AI applications that do not collect personal student information (such as email, name, or birthdate) and meet age requirements, typically 13 and older.

FAQ: What safety measures are in place when students use AI tools?

Source: web page, FAQ

Key safety measures for students using AI tools include:

- Student data is protected by following privacy laws like FERPA and COPPA, limiting data collection, using secure storage and maintaining transparency with families and stakeholders.
- Safe and ethical use is promoted through content filtering, monitoring student interactions and teaching responsible use, academic integrity, and the risks of misuse, such as plagiarism.
