Long Beach USD AI Web Page: Data and Student Privacy Passages

Excerpted verbatim from *Artificial Intelligence (AI) (Technology & Information Services, Long Beach Unified School District, California; web page)*. The source has no page numbers; locations are given by section. Ellipses (…) mark omitted text. This is a web page, so there are no page numbers. The age-appropriateness paragraph appears twice on the page (a short and a fuller version); only the fuller version is quoted.

Guiding Principles: We protect safety, privacy and data confidentiality

Source: web page, section 'Guiding Principles'

We protect safety, privacy and data confidentiality. AI is one of many technologies used in our schools, and its use aligns with existing privacy and data confidentiality policies. We understand the risks of AI and take care to keep confidential student and employee data out of public models and to secure the use of AI within our environment.

Responsible Use of AI (excerpt)

Source: web page, section 'Responsible Use of AI'

Staff are encouraged to explore, learn, and use AI tools in accordance with existing laws, District policies and guidelines. Each user bears the responsibility to ensure compliance with applicable laws and policies regarding data security and privacy. AI users are also responsible for reviewing all AI-generated output before use.

Age appropriateness

Source: web page, section 'Tips for Teachers / Tips for Students'

In accordance with Federal CIPA and COPPA regulations, most common consumer-grade GenAI tools, such as ChatGPT and Google Gemini, are not suitable for use by students under age 13. Education-specific GenAI tools may be appropriate for use by students under age 13, subject to approval of the Chief Academic Officer and General Counsel, and/or their designees. … A list of authorized applications and tools will be provided on the LBUSD website.
