Metro Nashville Public Schools Artificial Intelligence: Data and Student Privacy Passages

Excerpted verbatim from *Artificial Intelligence (Metro Nashville Public Schools web page)*. The source has no page numbers; locations are given by section. This is a district web page, so no page numbers are given.

What is AI? (excerpt)

Source: web page, section 'What is AI?'

Importantly, the AI tools used in MNPS are carefully reviewed and approved to make sure tool are safe, private, and age-appropriate. We do not allow AI tools that interact with or collect personal student information without going through the proper approval process.

Guiding Principles: Privacy, Data Protection, and Security

Source: web page, section 'Guiding Principles'

Protecting personal and sensitive information is crucial, complying with applicable local, state, and federal laws to ensure student and staff data privacy and security.

Guiding Principles: Transparency (excerpt)

Source: web page, section 'Guiding Principles'

The district shall ensure that AI systems used by students and/or employees, as well as those embedded within vendor products, are understandable with clear explanations of how decisions are made, fostering trust and accountability.

Community Notification and Approved Tool List (excerpt)

Source: web page, section 'Community Notification'

In accordance with MNPS Policy 4.124, the Director of Schools will provide notice to parents and guardians regarding the use of Artificial Intelligence (AI) programs in the district. A current and approved list of AI tools is published and maintained on the district website to ensure transparency and alignment with our commitment to responsible technology use.
