Maine DOE Technology Guidance: Data and Student Privacy Passages

Excerpted verbatim from *Technology Guidance for Maine SAUs, including AI Toolkit (Maine Department of Education; web page)*. The source has no page numbers; locations are given by section. Ellipses (…) mark omitted text. This is a landing page of best-practice bullets that links to the AI Toolkit; the toolkit itself is not included.

Acceptable Use Policies (excerpt)

Source: web page, section 'Acceptable Use Policies'

Consider the following best practices for AUPs

- Include guidance on devices (including personal devices), internet access, social media, AI, digital citizenship, cybersecurity, and data privacy.

Artificial Intelligence (AI) In Education (excerpt)

Source: web page, section 'Artificial Intelligence (AI) In Education'

Consider the following best practices for AI in Education

- Promote equity, privacy, and digital literacy in all AI-related instruction.

Cybersecurity in Schools

Source: web page, section 'Cybersecurity in Schools'

In today’s connected world, cybersecurity is essential. Maine schools are responsible for protecting student data and maintaining secure digital environments.

Consider the following best practices for Cybersecurity in Schools

- Conduct regular security assessments and keep software and devices updated.
- Implement multi-factor authentication, strong passwords, and secure backups.
- Educate staff and students about phishing, scams, and social engineering threats.
- Encourage a culture of shared responsibility; cybersecurity is everyone’s job.

Digital Citizenship & Wellness (excerpt)

Source: web page, section 'Digital Citizenship & Wellness'

Consider the following best practices for Digital Citizenship and Digital Wellness

- Embed conversations about media literacy, digital footprints, and online reputation into everyday instruction.
