Minnesota Artificial Intelligence in Education: Data and Student Privacy Passages

Excerpted verbatim from *Artificial Intelligence in Education (Minnesota Department of Education; updated June 2026)*. Page numbers match the document's own page numbering. Ellipses (…) mark omitted text. Passages from two-column layouts are marked [graphic]. Most of the privacy content here is brief; the resource lists (pages 4–6) are included only where the document's own description mentions privacy or security.

I. Guiding Principles for AI Use in Education: Ensure Safety, Ethics, and Effectiveness

Source: page 1 [graphic]

[graphic] Data privacy, security and content appropriateness should be primary considerations when adopting new technology. Consider existing policies related to these issues and how the use of AI fits into existing frameworks.

II. Learning with AI (excerpt)

Source: page 2

It is important for teachers to consider this question, along with the questions listed below, when selecting an AI tool or website to use with students:

- Is the application age appropriate?
- How is data collected and used, and does it meet data practices standard?

II. Learning with AI: Opportunities and Challenges Table, Data Privacy and Security (excerpt)

Source: page 3 [graphic]

[graphic] Data Privacy and Security: Ethical concerns surround student data collection, storage, and use, requiring robust privacy policies and safeguards. (See Minn. Stat.13.32 [2026] Educational Data)

III. Creating District-level Guidance: Begin with What Already Exists (excerpt)

Source: page 3

Consider the impact of the use of AI, particularly in:

- Data privacy
- Assessment
- Academic integrity

IV. AI in Education Resources: General Resources (excerpt)

Source: page 4

- AI Guidelines for Youth Mental Health Tools (Children's Hospital Association): This resource includes … key principals for evaluating vendors to promote privacy, bias mitigation, clinical efficacy and transparency, …
- Empowering Education Leaders: A Toolkit for Safe, Ethical, and Equitable AI Integration (Office of Educational Technology, US Department of Education): … It also summarizes the Federal laws needed to ensure AI is used safely, securely, and without discrimination.

IV. AI in Education Resources: Minnesota Resources (excerpt)

Source: page 5

- Minnesota Department of Transportation General Artificial Intelligence Standard: Clear guidance to ensure generative AI is used in alignment with the department's core values, legal requirements, policies, and security practices.
- Minnesota IT Services Transparent Artificial Intelligence Governance Alliance: Guidance for using AI to improve government services while ensuring ethical, equitable, and secure practices.

IV. AI in Education Resources: Other States (excerpt)

Source: page 6

- Generative Artificial Intelligence in K-12 Classrooms (Oregon): This resource addresses FAQs related to AI use in classrooms including equity implications, data privacy, and district policy.
