Introduction (excerpt)

Source: web page, introduction

Our AI philosophy outlines our principles and guidelines for the use of AI in our school district, emphasizing the importance of human-centered education and maintaining the highest standards of privacy, equity, and inclusivity.

3. Privacy, Data Security, and Safety

Source: web page, section 3

We are dedicated to safeguarding the privacy and data security of our educators and learners. We adhere to all applicable data protection regulations and implement robust security measures to prevent unauthorized access, use, or disclosure of personal information. When utilizing AI technologies, data collection and processing data will be anonymized or pseudonymized whenever possible. We prioritize data minimization, ensuring that only the necessary information is collected and stored.

Enterprise-Grade Protections: As a Google Workspace for Education Plus district, our version of Gemini comes with additional, enterprise-grade safety protections. This means our students and staff use a service designed specifically for a school environment, which is separate and more secure than the publicly available consumer version.

District Content Filtering: In addition to Google's safeguards, all access to Gemini on our network is routed through the district's own content filters. This adds a critical layer of protection, aligning with our existing internet safety policies and providing an even more secure experience for our students.

Our goal is not just to provide access, but to teach responsible and ethical use, reinforcing the principles of digital citizenship in the age of AI.
