- **Establish Approved AI Tool List:** Create and distribute an Approved AI Tool List to ensure all platforms used in classrooms meet District standards for privacy, safety, and equity.

## Our Key Principles: Data Privacy (excerpt)

Source: web page, section 'Our Key Principles'

Data Privacy: Protecting the privacy of students and staff is paramount. We advise against inputting personally identifiable information (PII) into AI systems.

## Data Privacy and Security

Source: web page, section 'Data Privacy and Security'

Ensuring data privacy and security is paramount when using GenAI tools. It is essential to avoid inputting any personally identifiable information (PII) or confidential information into AI systems to safeguard privacy. This includes student and staff contact information, demographic information and rosters. By strictly adhering to this guideline, we can utilize GenAI technologies effectively while protecting the integrity of personal data, since we have no control over the data once it is in those systems.
