Texas AI in Education Task Force Report: Data and Student Privacy Passages

Excerpted verbatim from *Leading the Way in K-12 Education: Recommendations of the Texas AI in Education Task Force (Texas Advanced Computing Center, The University of Texas at Austin, 2026)*. Page numbers match the document's own page numbering. Ellipses (…) mark omitted text. The report is a set of recommendations to state policymakers and has no standalone privacy section, so every passage is an excerpt. Passages from two-column pages whose text extraction interleaved the columns were transcribed from the rendered page and are marked [graphic]; bracketed numbers such as [10] are the report's own citation markers.

Executive Summary: The Challenge (excerpt)

Source: page 2

Continued inaction risks student misuse, over-reliance on AI, harm to cognitive and social-emotional development, data privacy violations, workforce unpreparedness, and uneven educational experiences across 1,200+ districts.

Executive Summary: Recommendation 2, Issue Statewide Guidance (excerpt)

Source: page 2

Texas should publish guidance covering responsible use policies for both educators and students, data privacy, AI procurement and student assessment.

Introduction (excerpt)

Source: page 3 [graphic]

[graphic] Conversely, AI can also be potentially damaging if students access AI tools without appropriate guardrails or lacking the knowledge and skills to critically evaluate AI outputs, safeguard their personal data, discern the difference between human relationships and AI generated outputs, and understand how to use AI to support their learning rather than as a substitute for deep thinking.

Texas AI in Education Task Force (excerpt)

[graphic] This vision calls for educational institutions to expand their focus beyond surface issues, such as academic integrity and data privacy, toward a more comprehensive goal of advancing AI literacy for all students and educators.

What do we mean by AI literacy for students? Critical Evaluation (excerpt)

Source: page 5 [graphic]

- [graphic] **Privacy:** Students understand that LLMs may use any information the students provide to train future models and that once personal information is shared, its privacy cannot be assured.

Background Information (excerpt)

Source: page 6 [graphic]

[graphic] Student safety not only revolves around the safe use of AI tools, but around guardrails that take into consideration screen time, student privacy, age appropriate practices, and more [10].

Background Information: State Guidance (excerpt)

Source: page 7 [graphic]

[graphic] State executive orders, legislation, and guidance related to AI in education typically include various layers, such as privacy, ethics, and academic integrity [15].

Recommendation #2: State Guidance Examples (excerpt)

Source: page 11 [graphic]

[graphic] North Carolina's guidance was created around four focus areas: Leadership and Vision, Human Capacity, Curriculum, Instruction, and Assessment, Data Privacy and Cybersecurity, and Technology, Infrastructure, and Devices.

[graphic] California's guidance has an emphasis on human connection and mental health, alignment to computer science standards requirements, and a focus on data privacy and security.

Process Suggestions for Guidance Issuance (excerpt)
