Virginia AI Education Guidelines: Data and Student Privacy Passages

Excerpted verbatim from *Guidelines for AI Integration Throughout Education in the Commonwealth of Virginia (Office of the Secretary of Education, Commonwealth of Virginia)*. Page numbers refer to the PDF pages of the source file. Ellipses (…) mark omitted text.

Guiding Principles: Do No Harm (excerpt)

Source: PDF page 1

- **Do no harm:** All integration of AI in education must be in accordance with the policy and IT standards that are set forth in the Executive Order and in other state and federal policies. This includes ensuring the safeguarding of the privacy, security, and confidentiality of personally identifiable information, ensuring that algorithms are not based on inherent biases that lead to discriminatory outcomes, and that AI is only allowed when its use has the potential to contribute positive good/improvement to the status quo.

Strategies for Successful Integration: Set The Right Conditions

Source: PDF page 3

Set The Right Conditions — When it comes to using AI or any other technologies in school, it is important to establish conditions for effective use. Clearly outline the school or system's policies and protocols around data privacy, honor code, student code of conduct, acceptable use, and ethical considerations when using AI, including those related to plagiarism and proper use of secondary sources.

Roles & Responsibilities: Ongoing Roles and Responsibilities (excerpt)
