Executive Summary (excerpt)

Source: Word document, section 'Executive Summary'

Key goals include developing policies for ethical AI use, enhancing data privacy, and adopting a human-centered approach to AI application.

This guidance addresses concerns such as equity, ethical use, and data privacy, advocating for responsible AI integration.

Ethics & Data Privacy

Source: Word document, section 'Ethics and Data Policy'

Integrating ethical considerations into every stage of AI use in education is essential. Safeguarding student data is also imperative. Districts should review existing policies and processes to incorporate AI-related language that reinforces ethical considerations as well as data privacy concerns in key areas.

Balancing the benefits and risks of AI, addressing biases and promoting equity among learners while protecting the data privacy of users is paramount to success when utilizing AI as a tool. Promoting information and media literacy efforts to guide staff and students in critically examining AI-generated results as well as educating all about the inherent risks to data privacy while utilizing AI will help ensure safe and engaging use of AI in educational spaces like schools and public libraries.

Empowering Minds, Protecting Privacy: Ethical AI Practices

- Transparency & Consent
- Data Encryption & Storage
- Compliance with Family Educational Rights & Privacy Act (FERPA)
- Vendor Compliance
- Compliance with Children’s Online Privacy Protection Act (COPPA)

Security & Infrastructure (excerpt)

Key Takeaways:

- Restrict access to student data to authorized personnel.
- Remove personally identifiable information from datasets.
- Define specific retention periods for student data.
- Provide comprehensive staff training on student data privacy.

- Develop and maintain a robust data breach response plan.
- Deploy scalable and secure data storage solutions.

Professional Development (excerpt)

Microsoft Learn - Offers learning paths specifically designed around AI education, including modules on AI ethics, machine learning, and data science.

Curriculum and Pedagogy (excerpt)

Source: Word document, section 'Curriculum and Pedagogy'

Equip the support community to instruct students on the responsible and safe use of AI, extending beyond the classroom to include libraries, homes, and peer interactions.

Monitoring, Evaluation, and Continuous Improvement (excerpt)

Source: Word document, section 'Monitoring, Evaluation, and Continuous Improvement'

- **Track Usage Data:** monitor how students and teachers interact with AI tools. This includes frequency, types of interactions, and time spent.
- **Privacy considerations:** Ensure student data collected by AI systems is secure and anonymized according to regulations.
